OUR PROMISE TO YOU

What it means to experience a stress-free remodel

> *“A home remodel should transform your life, not disrupt your sanity.”*

We believe that a beautiful home should not come at the cost of your peace of mind. Most homeowners dread remodeling because of scheduling chaos, hidden surprises and poor communication. We started our company to change that. When you partner with us, we take full responsibility for your entire project, from the initial sketch to the final sweep. Here is exactly what you can expect when you trust us with your home.

1

One Hand to Shake — Complete Project Accountability

You will never have to manage multiple contractors, track down material deliveries or resolve disputes between designers, architects and builders. We design the project, guide and source your finishes, coordinate licensed and insured trades and the permits, and manage the build timeline. If an issue arises, it is our job to solve it, and we keep you informed along the way.

2

Proactive Communication — No “Black Boxes”

You will never have to text us asking, “What is happening next week?” We believe that certainty eliminates anxiety. You will receive regular progress updates in your project portal, showing the current phase, what was completed and what is coming next, and we let you know right away about any adjustments.

3

Respect for Your Sanctuary

We never forget that your project site is first and foremost your home. Our trade partners sign our written Code of Conduct, which safeguards your comfort and respects your neighbors: daily site cleanup, strict dust containment, careful protection of your finishes and non-remodeled living spaces, and strict boundaries, so workers never use your bathrooms, kitchen or living areas.

1 · WHAT WE STAND FOR

Our mission

> *“Our goal is to manage the entire remodeling and building process for your space so you can enjoy creating your home without having to become your own designer, purchaser, scheduler and general contractor.”*

A successful remodel involves much more than construction. It requires hundreds of decisions, multiple specialized trades, material procurement, scheduling, design coordination, inspections, problem-solving and quality control. Orozco Homes provides a full-service, design-build remodeling experience designed to take that responsibility off the homeowner.

Our philosophy

Collaboration with you

We work collaboratively with you to develop the layouts, establish the design direction and guide material, fixture, finish and color selections, creating spaces that reflect your priorities.

Beauty that lasts

Every design balances aesthetics, functionality, constructability and long-term durability. Wet areas are properly waterproofed using professional installation methods and industry best practices.

Transparency

We align scope and selections with your desired investment level while maintaining transparency throughout, from preliminary estimate to final construction agreement.

Built to code

All applicable work is completed in accordance with local building codes, manufacturer requirements and professional construction standards, with required permits and inspections coordinated by us.

2 · WHAT DIFFERENTIATES US

More than a contractor

Our team manages every part of your remodel, so you have one partner instead of a long list of vendors, trades and schedules to coordinate.

WE MANAGE	WHAT IT MEANS FOR YOU
Client Communication	A clear point of contact throughout design, planning and construction.
Design & Space Planning	Layouts that balance beauty, functionality and the existing structure of your home.
Professional Design Guidance	Our designer guides cabinetry, tile, plumbing fixtures, lighting, carpentry, finishes and other selections.
Trade Coordination	Expert plumbers, electricians, carpenters, tile installers, painters, HVAC professionals and other specialized trades.
Architectural & Engineering Coordination	Architects, engineers and other professionals when required by the project.
Permitting & Inspections	Required permits, inspections and applicable construction requirements.
Material Procurement	We order and coordinate materials, so you do not manage vendors, deliveries and specifications.
Project Scheduling	Trades and materials sequenced to keep construction moving efficiently.
Construction Management	From demolition through completion, including the day-to-day decisions that arise.
Quality Control	Workmanship and installation reviewed throughout, with corrections coordinated when necessary.

How we work differently

Plan first, then build

No demolition or construction begins until all major selections are finalized and documented, to ensure efficiency, cost control and a seamless build process.

Clear, local pricing

Estimates are built line by line from current Virginia Beach / Hampton Roads labor and material pricing. Your proposal lists the allowances included for the products you select.

Allowances you can track

Each selection is compared with its allowance. If a selection costs more, the difference is added by change order; if it costs less, it is credited.

Nothing changes without your approval

Extra or changed work is documented as a change order that you review and approve before it is added to your project.

Your own project portal

One place for your project: phases and progress updates, a progress photo gallery, design selections to approve, messages, and proposals and agreements to review and sign electronically.

Trade partners held to our standards

Our trade partners are required to keep a current certificate of insurance and the required Virginia licenses, and to sign our written Subcontractor Standards and a Scope of Work for your job before starting.

Workmanship warranty

Our Construction Agreement includes a workmanship warranty: 12 months from substantial completion unless your agreement states otherwise. Manufacturer warranties on materials and fixtures are passed through to you.

Honest about remodeling

Existing homes can hide water damage, prior installations or outdated systems. We work to identify risks early and explain any verified unforeseen condition before work continues.

3 · OUR REMODELING SERVICES

What we build

Every project is priced and planned from our detailed remodeling scopes for the Virginia Beach and Hampton Roads area. Typical work for each service is listed below; your final scope is confirmed during design and planning.

Every project starts with a design consultation and selections. Where the work requires them, we also provide permit plans, building permits and inspections, engineering, site protection and dust barriers, and debris removal, and our trades clean the work area daily.

Bathrooms

SERVICE	WHAT IS TYPICALLY INCLUDED
Bathroom Remodel (small, medium & large)	Demolition, plumbing and electrical rough-in, waterproofing, floor and wall tile, shower pan and glass enclosure, vanity and sink, toilet, tub (medium and large baths), faucets and trim, lighting, mirror or medicine cabinet, accessories, paint and trim. Custom millwork for larger baths.
Add a Shower	Shower framing and blocking, new drain and vent tie-in, valve rough-in, shower pan and waterproofing, wall tile, glass door or enclosure, trim kit and head, exhaust fan, GFCI and light.
Tub-to-Shower Conversion	Tub removal, valve relocation and drain conversion, shower pan and waterproofing, wall tile, glass door or enclosure, trim kit and head.
Bathroom Refresh	New vanity and top, faucet, toilet, mirror or medicine cabinet, lighting and accessories, with hookups in the same locations (no tile or plumbing moves).
Aging-in-Place / Accessible Bath	Curbless shower with waterproofing, non-slip floor tile, widened 36" doorway, grab bars with blocking, comfort-height toilet, accessible vanity, handheld shower.
Second Vanity / Double Sink	Double vanity cabinet, countertop with two sinks, two faucets, plumbing branch for the second sink, lighting and mirrors.

Kitchens

SERVICE	WHAT IS TYPICALLY INCLUDED
Kitchen Remodel (small, medium & large)	Lower and upper cabinets, quartz or granite countertops, backsplash tile, island (medium and large), range or cooktop with hood, refrigerator, dishwasher, microwave, sink and faucet, flooring, lighting, plumbing and electrical rough-in, paint. Custom millwork for larger kitchens.
Kitchen Refresh	Cabinet painting (doors and boxes), new hardware, new countertops and backsplash tile, sink and faucet, under-cabinet lighting and wall paint.
Kitchen Island Addition	Island cabinets and countertop, island outlets and circuit, pendant lights, flooring patch.

Additions & Major Projects

SERVICE	WHAT IS TYPICALLY INCLUDED
Home Addition	Structural engineering, footings and slab, framing and sheathing, roofing, siding, windows and exterior door, electrical, plumbing and HVAC, insulation, drywall, flooring, trim and paint.
Portico (Covered Entry)	Footings, structural columns, beam and header work, roof framing and roofing, soffit and fascia, paver, slate or brick entry floor, exterior lighting and paint.
Garage Conversion	Slab repair and leveling, garage door infill, new window and door, electrical upgrade, HVAC mini-split, insulation and drywall, flooring, trim, paint and lighting; plumbing if a bath is added.
Attic Conversion	Joist reinforcement and subfloor, staircase to code, egress window, spray foam insulation at the roofline, HVAC mini-split, electrical, drywall, flooring, lighting, paint and trim.
Full House Renovation	Structural repairs, plumbing, electrical and HVAC replacement, roof, windows and siding, insulation and drywall, kitchen and bathrooms, flooring, trim, doors and paint.

Interior Renovations

SERVICE	WHAT IS TYPICALLY INCLUDED
Wall Removal / Open Concept	Wall removal, beam and temporary shoring for load-bearing walls, relocation of switches, outlets and lights, drywall and ceiling patch, flooring patch and paint.
Fireplace Removal + Built-In	Fireplace and hearth removal, framing infill, chimney cap and roof patch, built-in cabinets and shelving with lighting.
Flooring Replacement	Removal of old flooring, subfloor prep and leveling, LVP or hardwood, transitions and baseboard.
Interior Painting & Popcorn Ceiling Removal	Protection and masking, popcorn ceiling removal with testing, skim coat, walls, ceilings and trim.
Trim & Molding	Baseboard, crown molding, door and window casing, accent walls and wainscoting, caulk and paint.
Laundry Room / Mudroom	Cabinets and countertop, utility sink and washer box, dryer circuit and lighting, bench, hooks and cubbies, flooring.
Closets, Home Office & Built-Ins	Custom shelving and rods, drawers, desk, cabinets and shelving, outlets, data lines and lighting.
Staircase Remodel	Treads and risers, railing and balusters, newel posts, stain or paint.

Exterior & Outdoor

SERVICE	WHAT IS TYPICALLY INCLUDED
Deck (New or Rebuild)	Footings and posts, pressure-treated framing, decking (pressure-treated or composite), railing and stairs.
Screened Porch Conversion	Screen framing system and screen door, ceiling fan and lighting, beadboard ceiling, flooring or deck coating, paint or stain.
Windows, Exterior & Patio Doors	Removal of old units, installation with flashing, sill pans and insulation, hardware and lockset, interior and exterior trim and paint.
Siding Repair / Replacement	Removal of old siding, sheathing repair, housewrap and flashing, vinyl or fiber cement siding, trim, corners and soffit.

Repairs & Building Health

SERVICE	WHAT IS TYPICALLY INCLUDED
Crawlspace Encapsulation	Vapor barrier on walls and floor, sealed vents and rim joists, insulation, dehumidifier and sealed access door.
Water Damage / Mold Repair	Removal of damaged materials, drying and dehumidification, mold treatment, framing and subfloor repair, drywall, flooring and paint.

WORKING TOGETHER

The seamless journey ahead

Phase 1 · Precision Planning

We finalize every detail, drawing and fixture choice before construction begins, so your Construction Agreement is built on a finished plan.

1

Pre-Consultation Questionnaire

You share your project, your vision and your goals so we can prepare for our first meeting and make sure we are the right fit.

2

Consultation & Site Visit

We visit your home, listen to your priorities and review existing conditions.

3

Project Proposal

You receive a Project Proposal with a preliminary scope, estimated timeline and estimated investment range, which you can review and sign online.

4

Design & Selections

With our designer, we develop the layout and guide your selections. You approve each selection in your project portal and can compare it with its allowance. No demolition begins until all major selections are finalized and documented.

5

Construction Agreement

Once scope, selections and pricing are final, you receive a Construction Agreement with the timeline, total investment and payment schedule, and a confirmed start date.

Phase 2 · Secure Sourcing

We order and coordinate your materials so you never manage vendors, deliveries or specifications.

6

Materials Ordered & Tracked

Materials are ordered, tracked and scheduled with the trades, to keep construction moving efficiently.

Phase 3 · Managed Build

Our licensed, insured trade partners handle the physical transformation, coordinated by your Orozco Homes point of contact.

7

Construction

We manage every trade from demolition through completion. Follow each phase with progress updates and photos in your portal.

8

Changes, in Writing

If something changes or a concealed condition is found, it is documented as a change order that you review and approve before it is added.

Phase 4 · Flawless Handover

Final cleaning and thorough quality checks, presenting your newly reimagined home as you envisioned it.

9

Completion & Warranty

Punch list and closeout, backed by our workmanship warranty and the manufacturers' warranties.

Let's create your home together
